Summary

Growth-focused Computer Science student with proficiency in Python, Java, C++, and data structures. Skilled in building practical projects involving NLP techniques, Machine Learning, and Large Language Models. Currently in pre-final year at VIT, focused on acquiring Deep Learning expertise.

Education

Vellore Institute of Technology

B.Tech in Computer Science (Core) | CGPA: 9.02

Vellore, India

Aug 2023 – Present

Bhagwan Mahavir International School

Senior Secondary | Percentage: 83.6%

Gujarat, India

2023

L.P Savani School

Secondary | Percentage: 88.86%

Gujarat, India

2021

Skills

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

Frameworks & Libraries: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, OpenCV, Streamlit

Platforms & Tools: Git, GitHub, VSCode, Cursor, Google Colab, Jupyter

Soft Skills: Team management, Excellent communication, Event management

Experience

AI/ML Intern

May 2025 – Jul 2025

SentiAid

- Cleaned and preprocessed large speech/text datasets for an Indian Sign Language (ISL) translator using Python, deep learning, keypoint detection, and pose-based animation.
- Applied Pandas, Scikit-learn, and Regex to remove noise and align glosses with ASR outputs, improving training data quality.
- Gained exposure to animation pipelines and AI for accessibility applications.

Student Volunteer — Gravitas

Aug 2024 – Sep 2024

Vellore Institute of Technology

- Coordinated key events at Gravitas (VIT's annual tech fest), ensuring efficient planning and smooth execution.
- Collaborated with a team of 50+ members to align goals, contributing to innovative promotional strategies that increased participant engagement by **150%**.

Projects

Resume Feedback System | NLP, NLTK, TF-IDF, Python

Oct 2025

- Built an NLP-powered ATS scoring system combining dynamic skill-matching density (~70% weight) and section/layout completeness (~30% weight) for 1–100% explainability.
- Used NLTK sentence tokenizer to segment resumes into 5 categories, with a 2-layer text extraction pipeline.
- Implemented TF-IDF vectorisation (up to 1000 features) with cosine similarity to evaluate keyword relevance and ATS-friendliness.

Student Performance Predictor | ML, RandomForest, LLaMA, Python

Jul 2025

- Developed an ML model using RandomForestClassifier to predict student pass/fail outcomes with **94.5% accuracy**.
- Preprocessed and engineered features from quiz, midterm, and assignment scores using Pandas and NumPy.

- Integrated Meta's LLaMA model to generate personalised performance insights and recommendations.

E-Learning Platform | *HTML, CSS, JavaScript*

Mar 2025

- Built a full-featured e-learning platform with user authentication for secure access.

Heart Disease Detection Model | *Logistic Regression, RandomForest, Python*

Feb 2024

- Trained an ML model using Logistic Regression and RandomForestClassifier to detect heart disease with **88.65% accuracy**.

Certifications

Generative AI Workshop

Mar 2025

- Hands-on training in building generative AI models.
